CLIMATE FAMILIES SONGBOOK

Children's songs for a liveable future

FOSSIL FUELS ARE BAD

(to the tune of Ring Around the Rosies)

Fossil fuels are baaad
They make us saaaad
Cli-mate cha-ange
We all fall down

Renewables are good
Build them like you shoouould
Cli-mate jus-tice
We all stand up!

THIS PRETTY PLANET

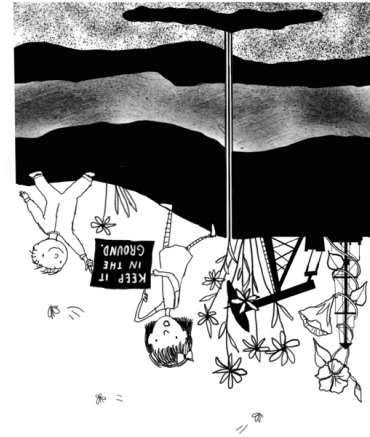

(Adapted from Tom Chapin and John Forster, can be sung as a round)

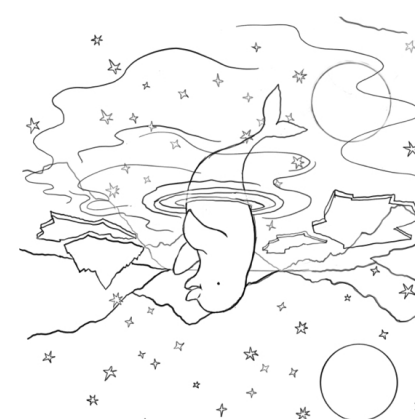

This pretty planet
Spinnin' in space
Our garden,
our harbor,
our holy place

Golden sun going down
Gentle blue giant
spin us around
All through the night
Safe, 'til the morning light

RISE LIKE THE WATER
The people gonna rise like the water
gonna face this crisis now
I hear the voice of my sons and daughters
Saying, "Climate justice now!"
The people gonna rise like the water
gonna shut this crisis down
I hear the voice of my great daughter
Saying "Keep it in the ground!"

BABY BELUGA
Baby beluga in the deep blue sea
Swim so wild and you swim so free
Heaven above and the sea below
You'll soon be wakin'
With tomorrow's sun, another day's begun
Baby beluga, oh, baby beluga
Good night, little white, good night
Moon is shining and the stars are out
Cut up, sing in your water bed
When it's dark, you're home and fed
Sing for all your friends, we like to hear you
Sing your little song
Baby beluga, oh, baby beluga
See the water squirtin' out of your spout
Way down yonder where the dolphins play
Where you dive and splash all day
Is your mama home with you, so happy
Is the water warm
Baby beluga, baby beluga
And a little white whale on the go
Heaven above and the sea below
Swim so wild and you swim so free
Baby beluga in the deep blue sea
By Burt, 1980

THAT'S HOW THE LIGHT GETS IN
Forget your perfect offering
(There is a crack in everything)
Just ring the bells that still can ring
Just ring the bells that still can ring
That's how (that's how)
The light (the light)
Gets in (That's how the light gets in)
Leonard Cohen, 1992

GLOWING SUN/BLOWING WIND
Oh, Glowing Sun, Sun, Glowing Golden Sun
Please shine down on me
Oh, Blowing Wind, Wind, Blustery Blowing Wind
Clean green energy
With good funding and policy
By the year 'Twenty Thirty
With solar, wind, and batteries
We'll be fossil free
Based on Mrs. Sun, Raffi, 1976
